## LIST OF TYPE SPECIMENS OF FISHES, AMPHIBIANS AND REPTILES IN THE ZOOLOGICAL MUSEUM, UNIVERSITY OF OSLO

PER PETHION

This list has been compiled according to the recommendations given in the International Code of Zoological Nomenclature and by ICOM.

The collection of type specimens embraces 62 species of fishes, 4 species of amphibians and 5 species of reptiles. Fishes from the North Atlantic, North Pacific and the NW Australian areas dominate the collection.

Specimens described and labelled as types, but which have shown not to be types, viz. *Aphanopus minor* Collett, 1886; *Argyreiosus pacificus* Lockington, 1877; *Eleotris dalayensis* Rendahl, 1922; *Gobius fallax* Sarato, 1889; *Gobius orca* Collett, 1874; *Lycodes agnostus* Jensen, 1901; *Scatophagus quadratus* De Vis, 1855; *Scatophagus ætate-varians* De Vis, 1885; *Terapon alligatoris* Rendahl, 1922 (Pisces) and *Egernia dahlii* Bouleenger, 1896; *Typhlops nigricauda* Bouleenger, 1895 (Reptilia), are also included in the list (with small print).

The type nomenclature of the International Code of Zoological Nomenclature is used. Within each order (fishes after Jordan 1963, amphibians and reptiles after Mertens and Wermuth 1960) the species are arranged alphabetically according to the names given in the original descriptions. When a name has been placed in synonymy later, the present name is added, with a reference to the paper in which the transfer was made. I do not claim to have traced all nomenclatural changes.

In cases where an obvious reason exists to select one of the syntypes as the type specimen, i.e. a specimen labelled as «type» by the author of the name, a specimen represented in a figure in the original description or later papers including the type material and the description, such a lectotype has been chosen. The remainder of the type series is then referred to as paralectotypes. When no indication of holo- or lectotype exists, nor an obvious justification for the choice of a lectotype, the material is simply referred to as syntypes. In these cases it seems preferable to leave the selection of a lectotype to future revisers.

All type material in other collections, collected or described by Norwegian scientists, is mentioned, and for the others a reference is given to the collection containing the main part of the type series. A number in brackets after a museum-number refers to the number of specimens in that sample. The following abbreviations are used:

BMNH	— British Museum of Natural History, London
CMNM	— Museo Civico di Storia Naturale, Milano
MNHN	— Muséum National d'Histoire Naturelle, Paris
NHMS	— Natural History Museum, Stanford University
NMG	— Naturhistoriska Museet, Göteborg
NMW	— Naturhistorisches Museum, Wien
NRMS	— Naturhistoriska Riksmuseet, Stockholm
QM	— Queensland Museum, Brisbane
USMN	— U. S. National Museum of Natural History, Washington
ZMB	— Zoologisk Museum, University of Bergen
ZMH	— Zoologisches Museum, Hamburg
ZMK	— Zoologisk Museum, University of København
ZMO	— Zoologisk Museum, University of Oslo

## PISCES

### EUSELACHII

**Pristurus murinus** Collett, 1904 (p. 4)

= *Galeus murinus* (Collett), vide Bigelow & Schroeder 1948, p. 214.

Holotype: ZMO J22 (juv.), alcohol; 150 km NW of the Hebrides 11/VIII—1902 — depth: 1100–1300 m (coll.: Michael Sars Exp. 1902, stat. 76).

Remarks: Holotype figured in Collett 1905 a, Pl. I. fig. 3.

### TECTOSPONDYLI

**Etomopterus princeps** Collett, 1904 (p. 1)

Syntypes: ZMO J65 (♀) alcohol; 150 km NW of the Hebrides, 12/VIII—1902 — depth: 1100 m (coll.: Michael Sars Exp. 1902, stat. 76).  
ZMO J64 (2 juv.), alcohol; 150 km SW of the Faroes 14/VIII—1902 — depth: 705 m (coll. Michael Sars Exp. 1902, stat. 79 b).  
ZMB 3496 (♀).

es  
or  
ip-  
on,  
is  
to-  
pe,  
ms  
or-  
en  
per  
ens

Remarks: Bigelow & Schroeder (1948, p. 488) placed *E. princeps* as synonymous with *E. spinax*, but later Bigelow, Schroeder & Springer (1953, p. 246) rank it as a distinct species.

#### BATOIDEI

##### **Raja hyperborea** Collett, 1879 (b, p. 7)

Holotype: ZMO J3134 (♂) alcohol; 115 km W of Norskøyane, Spitsbergen 14/VIII–1878 – depth: 839 m (coll.: Norwegian N. Atlantic Exp. 1876–1878, stat. 362).

Remarks: Holotype figured in Collett 1880, Pl. I, figs. 1–2.

##### **Raja nidrosiensis** Collett, 1882 (p. 1, Pl. 1)

Syntypes: ZMO J6339 (♂) stuffed (in very poor condition); Munkholmen, Trondheimsfjord April 1881.

Remarks: The description of this species was based on three specimens (2♀♀, 1♂), all of which are stated by Collett to be stored at ZMO. The two females, however, are not to be found and must be regarded as lost.

#### CHIMAEROIDEI

##### **Chimaera (Batyalopex) mirabilis** Collett, 1904 (p. 5)

= *Hydrolagus mirabilis* (Collett), vide Bigelow & Schroeder 1953, p. 533.

Lectotype: ZMO J133, alcohol; 150 km NW of the Hebrides 11/VIII–1902 – depth: 1100 m (coll.: Michael Sars Exp. 1902, stat. 76).

Paralectotypes: ZMO J131, alcohol; locality as for lectotype.

ZMO J132, alcohol; 150 km SW of the Faroes 14/VIII–1902 – depth: 750–840 m (coll.: Michael Sars Exp. 1902, stat. 79 and 79 b).

ZMB 1828.

Remarks: Lectotype figured in Collett 1905 a, Pl. I, figs. 4. The fifth types specimen: in ZMK.

#### ISOSPONDYLI

##### **Argyropelecus elongatus** Esmark, 1871 (p. 489)

Holotype: ZMO J650, alcohol; Chinese Ocean 1869 (coll.: Capt. Thoresen).

##### **Astronesthes luetkeni** Regan & Trewavas, 1929 (p. 16., fig. 5)

Holotype: ZMO J5580, alcohol; Indian Ocean (arrived at ZMO in 1878) (coll.: Capt. Thoresen).

Remarks: Holotype originally figured in Lütken 1892, Tab. III, figs. 1–2, as *Astronesthes Richardsonii* Poey, 1851.

Regan & Trewavas wrongly give the type locality as Pacific Ocean.

**Gonostoma microdon** G ü n t h e r , 1878 (p. 187)

= *Cyclothona microdon* (Günther), vide Goode & Bean 1895, p. 99.

Paralectotypes: ZMO J658 (2; in poor condition), alcohol; off Pernambuco,

S. Atlantic Ocean 9/IX-1873 — depth: 1271 m (coll.: Challenger Exp. stat. 120).

BMNH 1887.12.7.173 (1), 1887.12.7.175 (1), 1887.12.7.178 (1),  
1887.12.7.179 (1).

Lectotype: BMNH 1887. 12.7.174.

**Maurolicus tripunctulatus** E s m a r k , 1871 (p. 489)

= *Valencienellus tripunctulatus* (Esmark), vide Jordan & Evermann 1896, p. 577.

Holotype: ZMO J672, alcohol; Madagascar (coll.: Capt. H. Dahl).

Remarks: Holotype figured in Lütken 1892, Tab. I, fig. 6.

**Xenodermichthys socialis** V a i l l a n t , 1888 (p. 162, Pl. XIII, fig. 1)

Syntypes: ZMO J647, alcohol; Banc d'Arguin, Senegal 1883 — depth: 1230 m (coll.: Talisman, stat. XCV).

MNHN 85-218 (1), 85-170 to 85-181 (12), 85-205 to 85-217 (13).

#### APODES

**Cryptopterus lumholtzi** R e n d a h l , 1922 (b, p. 200)

Holotype: ZMO J5310, alcohol; Bulungan, NE Borneo 1914 (coll.: C. Lumholtz).

#### EVENTOCNATHI

**Puntius pulcher** R e n d a h l , 1922 (b, p. 203)

Holotype: ZMO J5309, alcohol; Bulungan, NE Borneo 1914 (coll.: C. Lumholtz).

Remarks: The paratype is missing.

#### NEMATOGNATHI

**Anodontiglanis dahli** R e n d a h l , 1922 (a, p. 169, fig. 2-3)

Holotype: ZMO J361, alcohol; Glencoe, NW Australia Jan. 1895 (coll.: K. Dahl).

Paratypes: ZMO J5235, alcohol; Daly River, NW Australia July 1894 (coll.: K. Dahl).  
RMS 10440 (1).

**Copidoglanis glencoenensis** R e n d a h l , 1922 (a, p. 170, fig. 4)

Lectotype: ZMO J5254, alcohol; Glencoe, NW Australia Jan. 1895 (coll.: K. Dahl).

Paralectotypes: ZMO J387, alcohol; Daly River, NW Australia 1/VIII-1894 (coll.: K. Dahl).

ZMO J6340 (7), alcohol; data as for lectotype.

RMS 10442 (2).

Remarks: The types from Daly River are said by Rendahl (p. 170) to be caught July 1894. On the label, however, is written 1/VIII—1894. For the Glencoe specimens the year is misprinted as 1893, but should be 1895.

**Copidoglanis obscurus** Rendahl, 1922 (a, p. 173, fig. 5)

Lectotype: ZMO J6341, alcohol; Glencoe, NW Australia 1893 (coll.: K. Dahl).

Paralectotypes: ZMO J5253 (8), alcohol; Hermit Hill 18/VIII—1894 (coll.: K. Dahl).

RMS 10451 (3).

Remarks: For paratypes only one locality, Hermit Hill, is given on the label, while two localities, viz. Glencoe and Hermit Hill, are given by Rendahl (p. 173).

#### INIOMI

**Lampadena chavesi** Collett, 1905 (b, p. 728)

Holotype: ZMO J693, alcohol; off the Azores.

**Scopelus colletti** Lütken, 1892 (p. 249, fig. 7)

= *Benthosema colletti* (Lütken), vide Goode & Bean 1895, p. 78.

Lectotype: ZMO J710, alcohol; 6 000 km W of Cape Horn, S. America, 1884 (coll.: Capt. Steinert).

Paralectotype: ZMK P 2316964.

#### ANACANTHINI

**Halargyreus affinis** Collett, 1904 (p. 6)

Syntypes: ZMO J2022, alcohol; 150 km NW of the Hebrides 11/VIII—1902 — depth: 1100—1300 m (coll.: Michael Sars Exp. 1902, stat. 76).

ZMO J2021 (2), alcohol; 150 km SW of the Faroes 14/VIII—1902 — depth: 750 m (coll.: Michael Sars Exp. 1902, stat. 79).  
ZMB 1644 (1), and 1808 (1).

Remarks: Typefigure in Collett 1905a, Pl. II, fig. 6.

**Motella septentrionalis** Collett, 1875 (a, p. 82)

= *Ciliata septentrionalis* (Collett), vide Svetovidov 1948, p. 92.

Lectotype: ZMO J5052, alcohol; Florø, W.Norway July 1873 — depth: 38—95 m (coll.: G. O. Sars).

Paralectotype: ZMO J5053, alcohol; Bodø, N. Norway Aug. 1874 — depth: 56 m (coll.: G. O. Sars).

Remarks: Lectotype figured in Collett 1875b, Pl. II.

HETEROSOMATA

- Limanda proboscidea** Gilbert, 1896 (p. 460)  
= *Limanda punctatissima proboscidea* Gilbert, vide Rendahl 1931, p. 71.  
Syntypes: ZMO J1861, alcohol; Bristol Bay, Alaska June 1890 — depth:  
20–40 m (coll.: Albatross Exp. 1890–91, stat. 3239).  
NHMS 3089 (2), and 3087 (1).
- Rhinoplagusia australis** Rendahl, 1922 (a, p. 190)  
= *Paraplagusia guttata* MacLeay, 1878; vide Weber & Beaufort 1929, p. 185.  
Holotype: ZMO J5232, alcohol; Roebuck Bay, NW Australia 1894–95 (coll.: K. Dahl).

PERCOMORPHI

- Ambassis dalyensis** Rendahl, 1922 (a, p. 187)  
Holotype: ZMO J2145, alcohol; Daly River, NW Australia July 1894  
(coll.: K. Dahl).  
Paratype: ZMO J5233, alcohol; same data as for holotype.  
Remarks: One paratype is missing.

- Aphanopus minor** Collie, 1886 (a, p. 1 & fig.)  
= *Aphanopus carbo* Lowe, 1839, vide Tucker 1956, p. 83.  
Holotype: ZMO J1797 (♂), alcohol; East coast of Greenland (65° N, 31° W) 4/VII-  
1886 (coll.: Capt. Pedersen).  
**Argyreiosus pacificus** Lockington, 1877 (p. 84)  
= *Selene vomer* Linne, 1758, vide Lockington 1881, p. 114.  
Syntype: ZMO J1735, alcohol; Lower California.

- Brama raschii** Esmark, 1862 (p. 238, Pl. I)  
= *Taractes raschii* (Esmark), vide Bigelow & Schroeder 1929, p. 43.  
Holotype: ZMO J4612, alcohol; Altafjord, N. Norway 1860 (coll.: dr. Scheel).  
Remarks: Esmark gives the type locality as: neighbourhood of Hammer-  
fest (N. Norway).

- Craterocephalus capreolus** Rendahl, 1922 (a, p. 175, fig. 6)  
Holotype: ZMO J993, alcohol; Roebuck Bay, NW Australia 10/XI–1895  
(coll.: K. Dahl).  
Paratype: RMS 10444.

- Rhombosoma trifasciata** Rendahl, 1922 (a, p. 182)  
Holotype: ZMO J995, alcohol; Mary River, NW Australia June 1895 (coll.:  
K. Dahl).

- Scatophagus ætate-varians** De Vis, 1885 (p. 456)  
= ? *Scatophagus multifasciatus* Richardson, 1844, vide Weber & Beaufort 1936, p. 10.  
Syntypes: ZMO J2350, alcohol; Moreton Bay, Queensland, Australia.  
QM I. 96 (1).

- Scatophagus quadratus** De Vis, 1885 (p. 455)  
= *Scatophagus argus* (Bloch, 1788), vide Weber & Beaufort 1936, p. 7.  
Syntype: ZMO J2357, alcohol; Mackay, Queensland, Australia.

**Terapon alligatoris** Rendahl, 1922 (a, p. 185)

= *Therapon bancrofti* Ogilby & McCulloch, 1916; Mees in litt.

Paratypes: ZMO J5230, alcohol; McKinley River, NW Australia Aug. 1895 (coll.: K. Dahl).

RMS 10439 (1).

Remarks: Holotype is missing.

## CATAPHRACTI

**Acanthocottus laticeps** Gilbert, 1896 (p. 422, Pls. 26-27)

= *Megalocottus platycephalus laticeps* (Gilbert), vide Taranets 1937, p. 115.

Syntypes: ZMO J1399, alcohol; Nushagak River, Alaska 3/VI-1890 (coll.: Albatross Exp. 1890-91).

NHMS 3016 (4). USNM 48651 (1)

**Acanthocottus sellaris** Gilbert, 1896 (p. 419)

= *Microcottus sellaris* (Gilbert), vide Schmidt 1940, p. 379.

Syntypes: ZMO J1401, alcohol; Bristol Bay, Alaska 2/VI-1890 — depth: 19-20 m (coll.: Albatross Exp. 1890-91, stat. 3232).

ZMO J1402 (3), alcohol; Bristol Bay, Alaska, May 1890 (coll.: Albatross Exp. 1890-91, stat. 3229).

NHMS 2847 (35), and 2846 (24). USNM 48575 (3).

**Agonus gilberti** Collett, 1894 (p. 670, Pl. XLV)

= *Podothecus gilberti* (Collett), vide Jordan & Evermann 1898, p. 2058.

Lectotype: ZMO J6342, alcohol; Kamtschatka (coll.: anon. Norwegian sailor, specimens sent to ZMO by H. Lund).

Paralectotypes: ZMO J1332 (1), J1333 (1) and J1334 (5, in bad condition).

Locality as for lectotype.

NHMS 2783 (2).

**Artediellus pacificus** Gilbert, 1896 (p. 416)

Syntypes: ZMO J1403 (12), alcohol; Bristol Bay, Alaska (coll.: Albatross Exp. 1890-91, stat. 3302).

ZMO J1404 (10), alcohol; Bristol Bay, Alaska (coll.: Albatross Exp. 1890-91, stat. 3306).

NHMS 2605 (41), 2602 (5), and 2604 (29). USNM 48605 (1), 48657 (6), 48658 (3), 48757 (1), 48664 (2), and 59410 (5).

**Cottunculus microps** Collett, 1875 (b, p. 20, Pl. I, figs. 1-3)

Holotype: ZMO J4128, alcohol; Hasvig, Sørøy, N. Norway Aug. 1872 — depth: 376 m. (coll: G. O. Sars).

Remarks: Collett gives date as Aug. 1874 in the description.

**Cottus aleuticus** Gilbert, 1896 (p. 418)

Syntypes: ZMO J1417, alcohol; Iluliuk, Unalaska, Bering Sea (coll.: Albatross Exp. 1890-91).

NHMS 2610 (19). USNM 48716 (1).

<b>Cottus lilljeborgi</b> Collett, 1875 (b, p. 25, Pl. I, figs. 4–5) = <i>Taurulus lilljeborgi</i> (Collett), vide Andriyashev 1964, p. 429. Syntypes: ZMO J4163, alcohol; Kristiansund, W.Norway Aug. 1871 (coll.: G. O. Sars). ZMO J4160, alcohol; Espvær, Hardangerfjord, W.Norway, July 1873 (coll. G. O. Sars).	Synty
<b>Elanura forcicata</b> Gilbert, 1896 (p. 430, Pl. 30) Syntypes: ZMO J1442, alcohol; Aleutian Islands (coll.: Albatross Exp. 1890–91, stat. 3214). USNM 48673 (1), 59404 (1), and 119654 (1). NHMS 2420 (3).	Lecto
<b>Icelinus borealis</b> Gilbert, 1896 (p. 415, Pl. 25) Syntypes: ZMO J6331 (3), alcohol; Aleutian Islands (coll.: Albatross Exp. 1890–91, stat. 3213). ZMO J1454 (3, in poor condition), alcohol; Bristol Bay, Alaska (coll.: Albatross Exp. 1890–91, stat. 3265). NHMS 2292 (34), and 2291 (6). USNM 53037 (6).	Radi
<b>Icelus canaliculatus</b> Gilbert, 1896 (p. 412, Pl. 24) Syntypes: ZMO J1459, alcohol; off Unalaska, Bering Sea ( $53^{\circ} 56' 50''$ N, $167^{\circ} 08' 15'$ W) 21/VIII–1890 – depth: 750 m (coll.: Albatross Exp. 1890–91, stat. 3329). NHMS 2182 (4).	Parale
<b>Icelus spiniger</b> Gilbert, 1896 (p. 412, Pl. 24) Syntypes: ZMO J1463 (3), alcohol (in poor condition); Alaska (coll.: Albatross Exp. 1890–91, stat. 3216). NHMS 2266 (2), 2269 (16), and 2231 (40). USNM 164258 (1).	Lecto
<b>Icelus vicinalis</b> Gilbert, 1896 (p. 413) Syntypes: ZMO J1464 (2), dry; Bristol Bay, Alaska 21/VIII–1890 – depth: 660 m (coll.: Albatross Exp. 1890–91, stat. 3331). USNM 48737 (2), 53038 (2), and 103605 (2). NHMS 3018 (12). and 3484 (1).	Xenoc
<b>Liparis bathybius</b> Collett, 1879 (b, p. 32) = <i>Paraliparis bathybius</i> Collett, vide loc. cit. Holotype: ZMO J4346 (♀, very worn), alcohol; 108 km W of Bear Island, Barents Sea 22/VII–1878 – depth: 1200 m (coll.: Norwegian N. Atlantic Exp. 1878, stat. 312). Remarks: Holotype figured in Collett 1880, Pl. II, fig. 14.	Syntyl
<b>Odontopyxis frenatus</b> Gilbert, 1896 (p. 435, Pl. 30) = <i>Sarritor frenatus</i> (Gilbert), vide Jordan & Evermann 1896, p. 448.	CHRC
	GOBIC
	Electris
	= <i>Bunne</i>
	Holotyp

Syntypes: ZMO J1352 (3), alcohol; Alaska June 1890 (coll.: Albatross Exp. 1890-91, stat. 3258).

NHMS 2973 (9), and 2974 (4). USNM 48668 (1), 48669 (1), 48670 (1), 48671 (1), 48726 (1), and 48750 (2).

**Odontopyxis leptorhynchus** Gilbert, 1896 (p. 437)

= *Sarrtor leptorhynchus* (Gilbert), vide Jordan & Evermann 1896, p. 448.

Paralectotypes: ZMO J1353, alcohol; Alaskan Peninsula (coll.: Albatross Exp. 1890-91, stat. 3267).

NHMS 2993 (2), and 3017 (6). USNM 53039 (1).

Lectotype: USNM 48727.

**Radulinus asprellus** Gilbert, 1891 (p. 88)

Paralectotypes: ZMO J1479, alcohol; Pacific Coast of North America (coll.: Albatross Exp. 1890-91, stat. 3059).

NHMS 25 (4).

Lectotype: USNM 43096.

**Rhinoliparis barbulifer** Gilbert, 1896 (p. 445)

Paralectotypes: ZMO J5124 (2), alcohol; Unalaska Island, Bering Sea 21/VIII-1890 (coll.: Albatross Exp. 1890-91, stat. 3330)

NHMS 3080 (2), 3092 (3) and 3022 (3). USNM 59364 (1).

Lectotype: USNM 48576.

**Xenochirus alascanus** Gilbert, 1896 (p. 438)

Syntypes: ZMO J1362 (9, in poor condition), alcohol; Unimak Pass, Alaska (coll.: Albatross Exp. 1890-91, stat. 3216).

NHMS 3000 (4), and 3088 (26). USNM 48721 (2), 48743 (4), and 59409 (7).

**Xenochirus latifrons** Gilbert, 1891 (p. 92)

Syntypes: ZMO J1364, alcohol; Pacific Coast of North America (coll.: Albatross Exp. 1890-91, stat. 2935).

USNM 43091 (1).

CHIROMIDES

**Petenia Krausii** Steindachner, 1878 (p. 12, Pl. II)

Syntypes: ZMO J2756 and J2757, alcohol; Cienega, Magdalena River, Colombia.

NMW 24543/551 (?), 24552/551 (?), and 24553/551 (?)

GOBIOIDEA

**Electris dalyensis** Rendahl, 1922 (a, p. 192)

= *Bunaka herwerdenii* (M. Weber, 1910), vide Koumans 1953, p. 351.

Holotype: ZMO J1101, alcohol; Daly River, Arnhem Land, NW Australia, July 1896 (coll.: K. Dahl).

Paratypes: ZMO J5234 (10), alcohol; locality as for holotype.  
RMS 19946 (1).

**Lun**  
Synt

Remarks: According to Rendahl there are eleven type specimens; the correct number, however, is twelve.

Rem

**Gobius ater** Bellotti, 1888 (p. 7, Pl. IV a, fig. 2a)

Syntypes: ZMO J1123 (4), alcohol; Nizza.

Remarks: The main type series stored in CMNM, was destroyed in World War II.

**Gobius Buccichii** Steindachner, 1870 (p. 627, Pl. I, fig. 4)

Syntypes: ZMO J1127, alcohol; Lesnia, Dalmatia 1882 (coll.: G. Buccichii).  
NMW 28782/792 (?).

**Lycod**  
= *Ly*  
Syntyp

**Gobius fallax** Sartori, 1889

= *Gobius buccichii* Steindachner, 1870, vide Perugia 1890, p. 506

Syntypes: ZMO J1133 (2), alcohol; Nizza.

Remai

**Gobius orca** Collett, 1874 (p. 446)

= *Lebetus scorpioides* ( $\sigma$ ) (Collett), vide Miller 1961, p. 676.

Holotype: ZMO J3999 ( $\sigma$ ), alcohol; Espevær, Hardangerfjord July 1873 — depth: 150—190 m (coll.: G. O. Sars).

Remarks: Holotype figured in Collett 1875c, Pl. III, figs. 1—3.

Miller (1961, 1963) has shown that *G. orca* and *G. scorpioides* are male and female respectively of a single species, but his proposal to set aside a first reviser selection (Miller 1964) has not been adopted (Opinion 880).

Rema

**Gobius scorpioides** Collett, 1874 (p. 447)

= *Lebetus scorpioides* (Collett), vide Winther 1877, p. 49.

Syntypes: ZMO J4020 ( $\varphi$ ) alcohol; Hvitingsø, Stavanger July 1872 — depth: 38 m (coll.: G. O. Sars).

ZMO J4021 ( $\varphi$ ) alcohol; Lyngholmen, Hardangerfjord Aug. 1873 — 113 m (coll.: G. O. Sars).

Remarks: Figured in Collett 1875 c, Pl. III, figs. 4—6.

## JUGULARES

**Harpagifer bispinis antarcticus** Nybelin, 1947 (p. 40, Pl. IV, figs. 5—8)

= *Harpagifer georgianus antarcticus* Nybelin, vide loc. cit. p. 74.

Syntypes: ZMO J6340 (1 $\sigma$ , 1 $\varphi$  and 3 unsexed), alcohol; Port Lockroy, Wiencke Island, Palmer Archipelago 20/I—1928 — depth: 6—40 m (coll.: O. Olstad).

ZMO J6341, alcohol; Candlemas, South Sandwich Islands 15/XI—1908 (coll.: C. A. Larsen).

NMG (1).

**Lumpenus mackayi** Gilbert, 1896 (p. 450, Pl. 32)

Syntypes: ZMO J1626, alcohol; Nushagah River, Alaska 3/VI—1890 (coll.: Albatross Exp. 1890—91).

NHMS 3085 (5). USNM 48633 (1).

Remarks: This species is described and figured by Gilbert as *Lumpenus mackayi*, but named as *Leptoblennius mackayi* in a list in the introduction to his report. In Jordan & Evermann 1896, p. 476 the species is listed as originally named *Leptoblennius mackayi*. Later (1898, Part III, p. 2437), however, they list it as originally named *Lumpenus mackayi*.

**Lycodes agnustus** Jensen, 1901 (p. 209)

= *Lycodes polaris* (Sabine, 1842), vide Andriyashev 1964, p. 293.

Syntypes: ZMO J4490 (3), alcohol; Kara Sea (coll.: Dijmphna Exp. 1882—83).  
ZMK 3, 6, 11, 16, 20, 22, 24—27, and 29 (1 specimen each).

Remarks: Two syntypes figured i Jensen 1904, Tab. VI, figs. la & b.

**Lycodes esmarkii** Collett, 1875 (b, p. 95)

Syntypes: ZMO J4496 (♂), alcohol; Kjelmø, S. Varanger, May 1864 — depth: 460 m (coll.: Klerk).

ZMO J4498 (♂), alcohol; Mortensnes, Varangerfjord 1885 (coll.: Nordvi).

Remarks: One syntype is missing.

**Lycodes gracilis** M. Sars, 1867 (p. 40, Tab. I, figs. 1—3)

= *Lycodes vahli gracilis* M. Sars, vide Smitt 1901, p. 22.

Holotype: ZMO J4525, alcohol; Drøbaksundet, Oslofjord 1865 — depth: 94—113 m (coll.: M. Sars).

**Lycodes frigidus** Collett, 1879 (b, p. 45)

Syntypes: ZMO J4517 and J4518, alcohol; 453 km W of Hammerfest 14/VI—1878 — depth: 2030 m (coll.: Norwegian N. Atlantic Exp. 1878, stat. 295).

ZMO J4519, alcohol; 450 km W of Bear Island 19/VII—1878 — depth: 2195 m (coll.: Norwegian N. Atlantic Exp. 1878, stat. 303).

ZMO J4520, alcohol; 230 km W of Icefjord, Spitsbergen 10/VIII—1878 — depth: 2438 m (coll.: Norwegian N. Atlantic Exp. 1878, stat. 353).

ZMO J4521 (juv.), alcohol; 325 km W of Bodø 19/VI—1877 — depth: 640 m (coll.: Norwegian N. Atlantic Exp. 1877, stat. 124).

ZMO J4522 (juv.), alcohol; 117 km W of Lofoten 29/VI—1877 — depth: 836 m (coll.: Norwegian N. Atlantic Exp. 1877, stat. 164).

ZMB 1688 (1), and 2223 (1). ZMK 24 (1). MNHN 1890—370 (1).

Remarks: Two syntypes figured in Collett 1880, Pl. III, figs. 23—24. One type specimen found completely damaged at ZMO, and six type specimens could not be traced.

**Lycodes lütkenii** Collett, 1880 (p. 103, Pl. III, fig. 25)

Holotype: ZMO J4536 (♀), alcohol; 115 km W of Norskøyane, Spitsbergen 14/VIII—1878 — depth: 839 m (coll.: Norwegian N. Atlantic Exp. 1878, stat. 362).

Remarks: *L. lütkenii* is given as synonymous to *L. rossi* Malmgren, 1864 by Jensen in 1901 (p. 197), but as a distinct species by the same author in 1904 (p. 57).

**Lycodes muræna** Collett, 1879 (a, p. 15)

= *Lycenchelys muræna* (Collett), vide Goode & Bean 1895, p. 309.

Holotype: ZMO J4538, alcohol; 325 km WSW of Bodø 19/VI—1877 — depth: 640 m (coll.: Norwegian N. Atlantic Exp. 1877, stat. 124).

Remarks: Holotype figured in Collett 1880, Pl. IV, fig. 30.

**Lycodes pallidus** Collett, 1879 (b, p. 70)

= *Lycodes pallidus pallidus* Collett, vide Jensen 1904, p. 37—49.

Syntypes: ZMO J4540, alcohol; 115 km W of Norskøyane, Spitsbergen 14/VIII—1878 — depth: 839 m (coll.: Norwegian N. Atlantic Exp. 1878, stat. 362).

ZMO J4541 (juv.), alcohol; 60 km W of Norskøyane, Spitsbergen 14/VIII—1878 — depth: 475 m (coll.: Norwegian N. Atlantic Exp. 1878, stat. 363).

Remarks: The types are figured in Collett 1880, Pl. III, figs. 26—27.

**Lycodes Sarsi** Collett, 1872 (p. 62 + 1 pl.)

= *Lycenchelys sarsi* (Collett), vide Jensen 1901, p. 214.

Holotype: ZMO J4555, alcohol; Utne, Hardangerfjord Sept. 1869 — depth: 188—282 m (coll.: G. O. Sars).

Holotype: ZMO J2996, alcohol; Roebusk Bay, NW Australia 1894-95 (coll.: K. Dahl).  
Paratypes: ZMO J5231 (5); same locality as for holotype.  
RMS 10445 (1).
- Rhodichthys regina** Collett, 1879 (b, p. 99)  
Holotype: ZMO J5128 (♂), alcohol; 465 km NE of Jan Mayen 16/VIII-1878 — depth: 2341 m (coll.: Norwegian N. Atlantic Exp. 1878, stat. 297).  
Remarks: Holotype figured in Collett 1880, Pl. V, figs. 37-39.
- PEDICULATI
- Linophryne lucifer** Collett, 1886 (b, p. 138, Pl. XV)  
Holotype: ZMO J5560 (♀), alcohol; off Madeira ( $36^{\circ}$  N,  $20^{\circ}$  W) May 1877 — depth: on surface (coll.: Capt. P. Andresen).

## AMPHIBIA

### SALIENTIA

- Chiroleptes dahlii** Boulenger, 1895 (p. 867, Pl. XLIX, fig. 2)  
= *Cyclorana dahlii* (Boulenger), vide Parker 1940, p. 17.  
Syntypes: ZMO K2002 (♂), alcohol; Daly River, NW Australia 1884-1885 (coll.: K. Dahl).  
BMNH 95.11.14.24 (♀).
- Megalixalus Stuhlmanni** Pfeffer, 1893 (p. 99)  
Syntype: ZMO K2003, dry; Zanzibar 6/VIII-1888 (coll.: F. Stuhlmann).  
Remarks: The main type series stored in ZMH, was destroyed during World War II.

**Rana macrodon leporina** Anderson, 1923 (p. 124)

Holotype: ZMO K2004, alcohol; Tumbang Maruwei, Borneo 1915 (coll.: C. Lumholtz).

Ande

**Rhacophorus colletti** Boulenger, 1890 (p. 36)

Holotype: ZMO K2005 (♀), alcohol; Langkat, Sumatra 1889 (coll.: Iversen).

Andr

Bellot

Bigele

## REPTILIA

### SAURIA

**Aeluroscalabotes longicaudatus** Anderson, 1923 (p. 122)

Holotype: ZMO K2006, alcohol; Bulungan, NE Borneo 1914-15 (coll.: C. Lumholtz).

Boule

**Diplodactylus stenodactylus** Boulenger, 1896 (p. 232)

Holotype: ZMO K2001 (♂), alcohol; Roebuck Bay NW Australia (coll.: K. Dahl).

**Egernia Dahlii** Boulenger, 1896 (p. 233)

— *Egernia kintorei* Stirling & Zietz, 1893, vide Mitchell 1950, p. 284.

Collett

Syntypes: ZMO K2007, alcohol; Roebuck Bay, NW Australia (coll.: K. Dahl).

BMNH 96. 7.2.14 (= RR 1946. 8.21.95) (1).

**Lygosoma Colletti** Boulenger, 1896 (p. 234)

— *Ctenotus collectti* (Boulenger), vide Storr 1964, p. 85.

Holotype: ZMO K2008, alcohol; Roebuck Bay, NW Australia Febr. 1896 (coll.: K. Dahl).

**Lygosoma ocellatum** Boulenger, 1896 (p. 233)

— *Ctenotus ocellatum* (Boulenger), vide Storr 1964, p. 85

(= *Ctenotus pantherinus ocellifer* (Boulenger), Storr in litt. & press).

Holotype: ZMO K2009, alcohol; Roebuck Bay, NW Australia Febr. 1896 (coll.: K. Dahl).

### SERPENTES

**Calamaria lumholtzii** Anderson, 1923 (p. 123)

Syntypes: ZMO —2010 (2 ♀♀), alcohol; Tumbang Maruwei, Borneo Sept. 1915 (coll.: C. Lumholtz).

**Typhlops nigricauda** Boulenger, 1895 (p. 867, Pl. XLIX, fig. 1)

— *Typhlops guentheri* Peters, 1865, vide Waite 1918, p. 23.

De Vis

Syntypes: ZMO K2011, alcohol; Daly River, NW Australia 1895 (coll.: K. Dahl).  
BMNH 95.11.14.25. (= RR 1946.1.11.18.) (1).
